PRINCIPLES FOR DECIDING THE CONTRIBUTION LOT ENTITLEMENT FOR A LOT

The contribution schedule lot entitlements have been decided using the relativity principle as defined in the *Body Corporate and Community Management Act 1997 (BCCM)*.

The contribution schedule lot entitlements for the scheme are not equal. As required by section 46A of the BCCM, the contribution schedule lot entitlements demonstrates the relationship between the lots by reference to one or more of the following factors (**Factors**);

1. How the scheme is structured;
2. The nature, features and characteristics of the lots in the scheme;
3. The purposes for which the lots are used;
4. The impact the lots have on the costs of maintaining the common property; and
5. The market values of the lots.

We discuss each of the Factors, and their applicability, below.

1 How the Scheme is structured

The scheme is not part of a layered arrangement of community titles scheme (for example, comprising a principal scheme and subsidiary scheme). Therefore the structure of the scheme does not affect the contribution schedule lot entitlements.

2 Nature, Features and Characteristics of the Lots

The body corporate is responsible for the repair and maintenance of common property within the scheme. This includes the recreation facilities, foyers, lifts, external walls and windows, roof, utility infrastructure and utility services. In deciding the contribution schedule lot entitlements the following increases the burden that a lot places on the body corporate costs for the maintenance, cleaning and repair of the common property:

- (a) **The area of the lot:** Additional entitlements are added the greater the size of the lot. The larger the area of the lot the greater demand on the support and shelter costs.
- (b) **The number of potential occupants:** Larger lots that can cater for a greater number of occupants have the potential to place a greater burden on common property and additional entitlements are added to reflect this.

The relative difference in lot entitlements recognises that the factors stated above do not impact on how much each lot should contribute to certain Body Corporate costs such as secretarial fees, audit fees, printing postage and outlays.

3 The Purposes for which the Lots are used

Each of the lots in the scheme is used for residential purposes and consequently this factor does not affect the contribution schedule lot entitlements.

4 The Impact the Lots have on the Costs of Maintaining the Common Property

The factors listed in item 2 *Nature, Features and Characteristics* of the Lots have been assessed as having an impact on the body corporate costs for the maintenance, cleaning and repair of the common property and additional entitlements are added to reflect this.

5 The Market Value of the Lots

This factor does not contribute to any differences in the lot entitlements.

PRINCIPLES FOR DECIDING THE INTEREST LOT ENTITLEMENT FOR A LOT

The interest schedule lot entitlements for this scheme are not equal.

As required by s46B of the *Body Corporate and Community Management Act 1997*, the interest schedule lot entitlements for this scheme have been calculated with regard to the market value principle and reflect the respective market value of the lots.
